VERALLIA RELEASES ITS Q1 2016 RESULTS

Paris, June 7, 2016 - Verallia Q1 results include the following highlights:

- **A favorable financial performance** of the operations, **driven by higher volumes** and cost control.
- **+2.6% growth in Revenue at constant exchange rate** (-2.2% at current exchange rate), mainly attributable to higher volumes in most of our domestic markets as well as increasing prices in South America in a high inflationary environment.
- **+14.1% increase in EBITDA at constant exchange rate** (+5.1% at current exchange rate), mainly attributable to **higher volumes** – resulting in a **better fixed-cost absorption**, as well as improved manufacturing performance and a tight control of costs.
- **Free cash-flow** impacted, as every year, by **working capital seasonality**. Working capital swings expected to reverse in the remaining quarters.
